

# What is Coronavirus?

And how to stay safe.

The coronavirus is a virus that can make people feel sick. It is also called COVID-19.

# People who have the Coronavirus may have:

- Sore throat and cough

- Fever

- Shortness of breath

If you get sick you need to stay home to get better.

Most people will be able to get better at home.

Some people will need to go the hospital to get better.

# I can help stop the spread of the virus by:

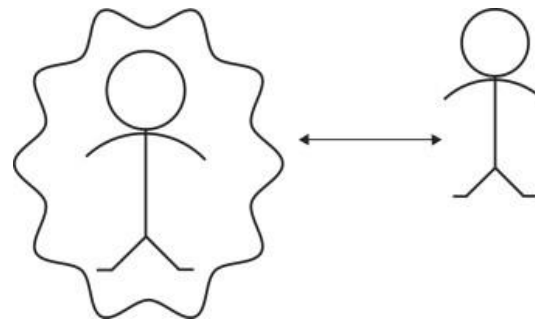

- Washing my hands with soap and water.

- Using hand sanitizer if I can't wash my hands.

- And giving people space.

# If I go out in the community I should:

- Wipe down things I touch.

- And use hand sanitizer or wash my hands before I eat or touch my face.

I may not be able to go to some of my favorite places.

- Restaurants and some places with lots of people are closed to keep people safe.

Once the Coronavirus is gone, I can go back to my favorite places!

# I can keep myself safe at home.

- If I feel worried I can talk with my staff or my team.
